

- Q1** Part of pistil which serve as landing platform for male gametophyte is-
- (A) style (B) stigma
(C) ovary (D) funicle
- Q2** The placenta is located.....
- (A) inside the ovarian cavity.
(B) outside the ovarian cavity.
(C) Both of the above.
(D) None of the above.
- Q3** Mark the **incorrectly** matched.
- (A) Single pistil - Monocarpellary
(B) Single pistil - Syncarpous
(C) Fused pistils - Syncarpous
(D) Free pistils - Apocarpous
- Q4** The ovule of an angiosperm is technically equivalent to
- (A) megaspore
(B) megasporangium
(C) megasporophyll
(D) megaspore mother
- Q5** Which of the following group of structure located inside ovary-
- (A) nucellus, locule and megasporangium
(B) integument, ovule and seed
(C) microsporangia and ovule
(D) megasporangia and stigma
- Q6** Which of the following sequence of development of embryo sac/ female gametophyte is **correct**?
- (A) Nucellus - Megaspore - Embryo sac.
(B) Nucellus - Megaspore mother cell - Megaspore - embryo sac.
(C) Nucellus - Megasporangium - Megaspore - Embryo sac.
(D)
- Nucellus - Megagametophyte - Megaspore - Embryo sac.
- Q7** Megaspore mother cell differentiate in..... region from nucellus.
- (A) Micropyle
(B) Chalaza
(C) Basal region of ovule
(D) Integument region of ovule
- Q8** Statement I: The megaspore mother cell undergoes meiosis to form 4 megaspores.
Statement II: Megaspore mother cells and megaspores both are diploid.
- (A) Both statements are correct
(B) Both statements are incorrect
(C) Only statement I is correct
(D) Only statement II is correct
- Q9** Embryo sac is monosporic when it develops from:
- (A) one of the four megaspores of a megaspore mother cell.
(B) three megaspores of megaspore tetrad.
(C) two functional megaspores.
(D) the megaspore mother cell where meiosis has occurred but cytokinesis does not take place.
- Q10** The largest cell in an embryo sac is;
- (A) Egg (B) Central cell
(C) Synergid (D) Antipodal cell
- Q11** How many nuclei are found in female gametophyte?
- (A) 8 (B) 7
(C) 6 (D) 5
- Q12** How many cells are found in female gametophyte?

(A) 6

(B) 8

(C) 7

(D) 5

Q13 Hilum is known as

(A) a place where ovule fuses with funicle.

(B) basal part of the ovule.

(C) a place where ovule attached to the placenta.

(D) None of the above.

Answer Key

Q1 (B)

Q2 (A)

Q3 (B)

Q4 (B)

Q5 (A)

Q6 (B)

Q7 (A)

Q8 (C)

Q9 (A)

Q10 (B)

Q11 (A)

Q12 (C)

Q13 (A)
