

Q1 Match List-I with List-II:

List-I		List-II	
A.	Ovum	I.	8-16 celled embryo formed in fallopian tube
B.	Zygote	II.	Implantation occurs in the uterine endometrium
C.	Morula	III.	Formed after sperm entry
D.	Blastocyst	IV.	Single, diploid cell formed as a result of fertilization

- (A) A-III, B-IV, C-I, D-II
 (B) A-IV, B-III, C-I, D-II
 (C) A-II, B-IV, C-I, D-III
 (D) A-I, B-IV, C-III, D-II

Q2 Identify the structure X correctly.

- (A) Morula (B) Blastocyst
 (C) Ootid (D) Blastomere

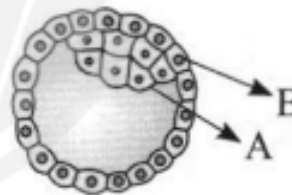

Q3 Identify the stage A and B and what are the correct labellings of C and D?

Choose the **correct** option

- (A) A - Morula, B - Blastocyst, C - Follicular cells, D - Inner cell mass
 (B) A - Morula, B - Blastocyst, C - Embryo, D - Trophoblast
 (C) A - Morula, B - Blastocyst, C -Trophoblast, D - Inner cell mass
 (D) A -Blastocyst, B - Morula, C -Trophoblast, D - Inner cell mass

Q4 The figure given below represents one of the stages of embryo development in humans. Determine the row that **correctly** identifies the labels A and B with their respective functions.

	A	B	Function of A	Function of B
(1)	Ectoderm	Endoderm	Differentiated as embryo	Get attached to the endometrium
(2)	Trophoblast	Inner cell mass	Differentiated as embryo	Get attached to the endometrium
(3)	Inner cell mass	Trophoblast	Differentiated as embryo	Get attached to the endometrium
(4)	Trophoblast	Inner cell mass	Get attached to the endometrium	Differentiated as embryo

- (A) 1 (B) 2
 (C) 3 (D) 4

Q5 Match the following and choose the correct option.

A.	Trophoblast	(i)	Embedding of blastocyst in the endometrium
B.	Cleavage	(ii)	Group of cells that would differentiate as embryo
C.	Inner cell mass	(iii)	Outer layer of blastocyst attached to the endometrium
D.	Implantation	(iv)	Mitotic division of zygote

- (A) A-(ii), B-(i), C-(iii), D-(iv)
 (B) A-(iii), B-(iv), C-(ii), D-(i)
 (C) A-(iii), B-(i), C-(ii), D-(iv)
 (D) A-(ii), B-(iv), C-(iii), D-(i)

Q6 Blastocyst becomes embedded in the _____ of the uterus. This is called _____ and it leads to pregnancy.

- (A) Perimetrium, gastrulation
 (B) Myometrium, implantation
 (C) Endometrium, implantation
 (D) Perimetrium, implantation

Q7 Given below are two statements.

Statement-I: After implantation, blastocyst gets embedded in the myometrium of uterus.

Statement-II: Uterine cells divide rapidly and cover the blastocyst once it gets attached to the uterine wall.

In the light of the above statements, choose the most appropriate answer from the options given below:

- (A) Statement-I is correct but Statement-II is incorrect.
 (B) Statement-I is incorrect but Statement-II is correct.
 (C) Both Statement-I and Statement-II are correct.
 (D) Both Statement-I and Statement-II are incorrect.

Q8 Match column I with column II and select the correct option from the codes given below

	Column I		Column II
A.	Cleavage	(i)	Fertilisation
B.	Morula	(ii)	Mitotic divisions
C.	Polyspermy	(iii)	Endometrial
D.	Implantation	(iv)	Little mulberry

- (A) A-(ii), B-(iv), C-(i), D-(iii)
 (B) A-(i), B-(iv), C-(ii), D-(iii)
 (C) A-(iv), B-(ii), C-(i), D-(iii)
 (D) A-(ii), B-(iv), C-(iii), D-(i)

Q9 Match the following and choose the correct options:

Column-I		Column-II	
A.	Trophoblast	i.	Embedding of blastocyst in the endometrium
B.	Cleavage	ii.	Group of cells that would differentiate as embryo
C.	Inner cell mass	iii.	Outer layer of blastocyst attached to the endometrium
D.	Implantation	iv.	Mitotic division of zygote

- (A) A-ii, B-i, C-iii, D-iv
 (B) A-iii, B-iv, C-ii, D-i
 (C) A-iii, B-i, C-ii, D-iv
 (D) A-ii, B-iv, C-iii, D-i

Q10 Which one of the following is the precise site of embryo implantation in a normal pregnancy?

- (A) Endometrium (B) Vagina
 (C) Oviduct (D) Cervix

Answer Key

Q1 (A)

Q2 (B)

Q3 (C)

Q4 (C)

Q5 (B)

Q6 (C)

Q7 (B)

Q8 (A)

Q9 (B)

Q10 (A)
