

Q1 Given below are two statements: one is labelled as Assertion (A) and the other is labelled as Reason (R):

Assertion (A): Diseases can be broadly grouped into infectious and non-infectious.

Reason (R): Diseases which are easily transmitted from one person to another, are called non-infectious diseases.

In the light of the above statements, choose the **correct** answer from the options given below:

- (A) A is true but R is false.
- (B) A is false but R is true.
- (C) Both A and R are true and R is the correct explanation of A.
- (D) Both A and R are true but R is NOT the correct explanation of A.

Q2 Diseases are broadly classified into infectious and non-infectious diseases. In the list given below, identify the infectious diseases.

- I. Cancer
- II. Influenza
- III. Allergy
- IV. Smallpox

- (A) I and II
- (B) II and III
- (C) II and IV
- (D) Only II

Q3 Mark the **correct** statements:

- (a) Yoga has been practiced to achieve physical and mental health.
- (b) Infectious diseases are very common and everyone of us suffers from these at sometimes or other.
- (c) AIDS is an infectious disease.
- (d) Cancer is non-infectious disease.
- (e) Healthy persons bring economic prosperity.

- (A) a, b and c
- (B) b, c, d and e
- (C) c and d
- (D) a, b, c, d and e

Q4 Assertion (A):- Health simply means 'absence of disease' or 'physical fitness.'

Reason (R):- Health increases longevity of people and reduces infant and maternal mortality.

- (A) Both A and R are true, and the R is a correct explanation of the A
- (B) Both A and R are true, but the R is not a correct explanation of the A
- (C) A is true, and the R is false
- (D) A is false and R are true

Q5 Read the following statements about health and select the incorrect one.

- (A) Immune system maintains our health.
- (B) Health is defined as a state of complete physical, mental and social well-being.
- (C) Health increases productivity and economic prosperity.
- (D) Health increases infant and maternal mortality.

Q6 Which of the following is the most accurate definition of infection?

- (A) The presence of microorganism in a particular location.
- (B) The disruption of normal host functions by microorganisms.
- (C) The survival and reproduction of microorganisms in a host.
- (D) The appearance of symptoms in a host, caused by microorganisms.

Q7 Read the following statements and select the incorrect one.

- (A) When the functioning of one or more organs or systems of the body is adversely affected, characterised by appearance of various signs and symptoms, i.e. we have a disease.

- (B) Some of the infectious diseases like AIDS are fatal.
- (C) Pathogens cause harm to the host by living in (or on) them.
- (D) None of the above.

Q8 Which of the following can affect one's health?

- I. Genetic disorders
II. Infections
III. Lifestyle

Which of the key words given above are correct?

- (A) I and II
(B) I and III
(C) II and III
(D) I, II and III

Q9 Which of the following is an **incorrect** match?

- (A) Ringworm infections- Trichophyton
(B) Pneumonia- Haemophilus influenzae
(C) Common cold- Retrovirus
(D) Amoebic dysentery- Entamoeba histolytica

Q10 Choose the **incorrect** statement from the following.

- (A) Pneumonia in humans infects the alveoli of the lungs.
(B) Retroviruses infect the nose and respiratory passage but not the lungs.
(C) Entamoeba histolytica is a protozoan parasite in the large intestine of human.
(D) Ascaris is an intestinal parasite and causal organism of ascariasis.

Hints & Solutions

Note: scan the QR code to watch video solution

Q1 Text Solution:

Diseases are commonly categorised into two main groups: infectious diseases, which are caused by pathogens and can spread from one person to another and non-infectious diseases, which are not caused by pathogens and cannot spread between individuals.

Video Solution:

Q2 Text Solution:

- 1) Diseases are broadly classified into two groups, infectious and non-infectious diseases.
- 2) Infectious diseases: Diseases that are easily transmitted from one person to another through pathogens or through body fluids, through the blood, breathing in an airborne virus; or by being bitten by an insect are called infectious diseases. Ex. AIDS
- 3) Non-infectious diseases: Diseases that are not transmitted through a pathogen from one person to another are called non-infectious diseases. Ex. Cancer
- 4) Therefore, among the given diseases only influenza and smallpox are the infectious disease.

Video Solution:

Q3 Text Solution:

(D)

- Yoga is commonly done for achieving both physical as well as mental health. Hence the first option is correct.
- AIDS is Acquired Immuno Deficiency Syndrome caused by the human Immunodeficiency virus. It is an infectious disease.
- Infectious disease can spread from one person to another through saliva, air droplets etc.
- Cancer is an example of a non-infectious disease as it does not spread from one person to another.
- Health is a state of complete physical, mental and social well-being. A healthy person can work more efficiently which increases productivity and thus brings economic prosperity. Hence all above-mentioned points are correct.

Video Solution:

Q4 Text Solution:

Health simply does not mean 'absence of disease' or 'physical fitness. It refers to mental, physical and social well being of a person

**Q6 Text Solution:**

The invasion, survival and multiplication of microorganisms in our body is called infection. Certain criteria must be met for an infection to be successful -

1. The microorganism must be high in number to cause some damage
2. The microorganism must be able to survive in our body.
3. A pathway must be present to enter the host such as respiratory tract.
4. A transmission mode must be there such as air, water or vectors
5. Host must be susceptible.

Video Solution:**Q7 Video Solution:****Q8 Text Solution:**

All three factors significantly impact human health:

- **I. Genetic disorders:** Conditions like **sickle cell anemia, hemophilia, and Down syndrome** are inherited and can affect health from birth.

- **II. Infections:** Diseases caused by **pathogens (bacteria, viruses, fungi, protozoa, helminths)** can lead to illnesses such as **tuberculosis, influenza, and malaria**.
- **III. Lifestyle:** Factors like **diet, exercise, stress, smoking, and alcohol consumption** influence overall well-being and the risk of diseases like **diabetes, hypertension, and obesity**.

Video Solution:**Q9 Text Solution:**

Rhino viruses represent one such group of viruses that cause one of the most infectious human ailments – the common cold.

[NCERT (2025-26) Class 12th Page no. 131]

Video Solution:**Q10 Text Solution:**

(2)

- Pneumonia in humans infects the alveoli (air-filled sacs) of the lungs.
- Rhino viruses infect the nose and respiratory passage but not the lungs.
- *Entamoeba histolytica* is a protozoan parasite in the large intestine of human.
- *Ascaris*, an intestinal parasite causes ascariasis.
